## NYCEDC Streetscape Improvement Project

PROJECT UPDATE • JANUARY/FEBRUARY 2015

# WINTER STOPS NO WORK

### Current Work

Despite freezing mornings and the occasional bout with snow, the project moves forward through the winter months. Most work, aside from landscaping, can be done during these chilly months with the right precautions taken. The most temperature sensitive work is concreting, but through using proper techniques to combat cold weather such as using temperature controlled blankets, the project has been successfully continuing to place new curb lines throughout the western end. Our workers have bundled up considerably compared to when work started in April and they are reminded weekly about the proper ways to deal with the weather and its impacts on their tasks and themselves. There may be some days when particularly bad weather may force work to halt, but we are making every effort to minimize these days. We look forward to warmer temperatures, but we wanted to assure the community that cold weather will not keep the project from moving forward.

### Upcoming Work

Work on the western end of the project will continue for the coming months. The work zone map, to the right, reflects our current work areas throughout the project area. As always, our current work areas are highlighted in orange and future work is in green. We look forward to future updates when we will add a third color to indicate completed work.

### Community Outreach

Mr. Patrick Jordan is available to answer your questions and concerns. He can be reached at 347-840-0914 or [West125@Zetlin.com](mailto:West125@Zetlin.com). Project updates will be produced monthly to review completed work and preview upcoming construction activities. To receive this update electronically simply send an email to [West125@Zetlin.com](mailto:West125@Zetlin.com) to subscribe.
